

Empowering Secure Transactions: The Cryptera Advantage

Empowering Secure Transactions: The Cryptera Advantage

In the ever-evolving landscape of digital payments, businesses and consumers alike seek solutions that not only enhance operational efficiency but also fortify security measures. At Cryptera, we understand the criticality of these requirements. Our commitment to innovation and excellence in payment solutions is evident in our comprehensive suite of products and services designed for a myriad of transactional environments. Here's a closer look at how Cryptera is revolutionizing the payment experience with our Unattended Payment Solutions and Encrypting PIN Pads (EPP).

Customizable Payment Solutions for Every Need

Cryptera offers an array of OEM products that seamlessly integrate to meet and exceed your business's unique payment needs. Our Unattended Payment Solutions stand at the forefront of technology, equipped with the latest certified payment innovations. The flexibility embedded in our solutions allows businesses to craft a payment interface that is not just secure but also highly adaptable and user-friendly. Whether it's about choosing from our range of secure payment components or configuring the most efficient payment environment, Cryptera has got you covered.

State-of-the-Art Encrypting PIN Pads (EPP)

Our portfolio of EPPs is tailored to fit diverse business requirements, ensuring adaptability and comprehensive security. With certifications up to the PCI 6.x security standard, our EPPs provide unparalleled protection for your sensitive data. Cryptera's legacy in developing and manufacturing top-tier EPPs for global customers speaks volumes of our expertise and commitment to quality. Our development team is at the ready, eager to implement software changes and adaptations that align perfectly with your requirements and backend solutions.

Innovation Meets Flexibility

Our complete in-house value chain offers remarkable flexibility and reduced lead times, even for smaller series. With an ISO 9001 certified supply chain and manufacturing setup, we guarantee high-quality performance from the development phase right through to the final product. Our manufacturing process incorporates a high degree of automation, ensuring consistent quality performance and a competitive edge in our total offerings to customers.

Addressing Tomorrow's Needs Today

The rising demand for PIN on Glass with encryption functionality has not gone unnoticed. Cryptera is at the forefront, developing solutions that meet this growing need, thereby enhancing security and adding a layer of convenience for customers. Here's how our payment solutions with PIN verification stand out:

1. Enhanced Security: PIN adds an extra layer of security compared to Signature, which reduces unauthorized access and fraud risks.
2. Fraud Prevention: PIN prevents unauthorized use of stolen or lost cards, which gives peace of mind.
3. Convenience and Speed: Quick, efficient transactions without the need for Signature and paper receipts.
4. Lower Transaction Fees: Merchant fees are typically lower for PIN transactions.
5. Wide Acceptance: Accepted in a vast array of retail locations worldwide.
6. Personalized Security: Customers may select their unique PIN, enhancing security.
7. International Compatibility: Ensures a consistent payment experience across the globe.

Cryptera is not just about offering payment solutions; it's about creating an ecosystem where transactions are secure, efficient, and seamless. Our dedication to innovation, quality, and security positions us as a leader in the payment solutions sector. We invite businesses and consumers alike to experience the Cryptera difference – where every transaction is an opportunity for growth, security, and unmatched convenience.
